### INTERIM CEO SUCCESS

*A multi-site hospital system in Wisconsin partnered with LeaderStat to assist in a key leadership transition. The board of this not-for-profit organization needed a strong interim VP of Home Health and Hospice to lead the organization through critical changes and key projects moving forward.*

*After conducting an assessment of this client's needs, LeaderStat identified a proven, experienced candidate to provide financial direction, clinical leadership and overall guidance to both the staff and directors. The interim professional effectively led the organization through a time of uncertainty and allowed for a seamless transition when new clinical leadership took over.*
